# TDD & TASKING

郑培真 (pzzheng@thoughtworks.com) 周颖(ybzhou@thoughtworks.com)

## 两个原则:

- 1. write new code only if you first have a failing automated test.
- 2. eliminate duplication:

# 编程节奏:

- 1. **Red** write a little test that doesn't work, perhaps doesn't even compile at first
- 2. Green make the test work quickly, committing whatever sins necessary in the process.
- 3 Refactor eliminate all the duplication created in just getting the test to work.

#### **TASKING**

## 两个原则:

- 1. 增量迭代式开发的思想列 task
- 2. 每个 task 都应该是可以测试的
- 3. 每个 task 时间控制在有限时间以内(比如半个小时)

# 猜数字游戏:

游戏系统会随机给出四个不重复的数字,玩家看不见,但玩家可以猜这四个数字分别是几。猜的数字序列自左向右,如果猜对了数字也猜对了数字在序列中所处的位置,就记为一个A,如果猜中了数字在序列中,但位置不对,则记为一个B。游戏会一直提示玩家猜数字的结果,比如"xAxB",直至玩家猜对全部结果,则提示为"4A0B",游戏结束。
